

# DYNA-GUARD® SNOW RETENTION

## DYNA-GUARD®

### SNOW RETENTION FOR METAL ROOFS

DYNA-GUARD installed on roof

**DYNA-GUARD** is a snow retention system designed to be used on metal roofs. This system can be easily installed on a new construction project or retrofitted to an existing metal roof.

**DYNA-GUARD** is an 8' long extruded aluminum stick with a T-shape profile. Simply insert a 2" wide painted strip of metal from the same material as the roof to maximize roof line aesthetics and to provide year round protection from devastating snow and ice avalanches.

If the distance between the seams of the roof are divisible by 4" or 6" then ordering pre-punched **DYNA-GUARD** will be by far, your lowest cost best alternative. However, if the seam width is not divisible by 4" or 6" then you will

order unpunched **DYNA-GUARD** and either: 1) use VersaClips™ – which we do not stock or 2) field drill a 7/16" hole. Here, field drilling is the lowest cost best alternative. Think it thru!: by field drilling you save the labor to locate the box of VersaClips and you save the labor of slipping the clip onto the 8' long stick of **DYNA-GUARD** and then lining the clip up with the bolt hole and you save material cost of about \$2/clip—say roughly \$3 in total. ALL of those savings are achieved **for each and every** 7/16" hole that you drill through easily drilled .100" aluminum! You know that your men can drill a hole thru aluminum for much less than \$3/hole!

**TAKE THE \$5 CHALLENGE** - We can PROVE that field drilling is the best cost alternative when you are forced to use unpunched by taking this challenge: We will credit you \$5/stick for each unpunched stick that you buy from us if you field drill the holes and then tell us if your overall cost to install was higher or lower (either way) versus using a clip. Also, invoiced cost must be as per quantity break columns illustrated below. This offer is limited to your first two purchases of unpunched **DYNA-GUARD**.

# DYNA-CLAMPS™ and SNO-DAMS®

Above illustrates the four positions that a DC-U can be installed on standing seam. Plus, the clamp can be positioned such that the bolt can be up slope or down slope, depending on your application. Seven different **DYNA-CLAMPS** with round-point setscrews are available to accommodate many different profiles of standing seam metal roofs. All **DYNA-GUARD**, **DYNA-CLAMP** and **SNO-DAM** items are extruded out of aircraft quality, high tensile aluminum "6005A T61 Aluminum". All of these components are proudly manufactured in the U.S.A.

**DC-U MINI**

**DYNA-CLAMPS™** are a non-ferrous non-piercing clamp for attachments to standing seam metal roofs. **DYNA-CLAMPS** are pre-packaged with stainless steel round-point setscrews that won't pierce the panel and stainless steel bolts. Our bolts are the familiar English standard  $\frac{5}{16}$ -18 bolt — not metric.

CLAMP	PCS/ BOX	BROKEN BOX	1-4 BOXES	5-9 BOXES	10-19 BOXES	20+ BOXES
DC-U	30	\$6.90	\$5.70	\$5.35	\$5.00	\$4.75
DC-SL	30	6.35	5.25	4.90	4.65	4.40
DC-NF	30	6.80	5.60	5.25	4.95	4.70
DC-DF	60	4.95	4.00	3.80	3.60	3.40
DC-TS	48	7.00	5.80	5.40	5.15	4.90
DC-ZR	44	7.50	6.10	5.70	5.40	5.15
DC-U MINI	50	4.50	3.85	3.60	3.40	3.25

**SNO-DAMS®** inhibit the ability of snow and ice to slide under the installed **DYNA-GUARD**. They slide on the back of the **DYNA-GUARD** from either end. **SNO-DAMS** are necessary to have installed between every seam. Both are 3" wide.
