## **Dyna-Coat®** Technical Data Sheet

**Dyna-Coat®** is a top quality organic polymer coating. It is designed to provide optimum corrosion resistance for metal fasteners. Fasteners that are coated **Dyna-Coat®** with exhibit excellent resistance to marring, chipping and abrasion. The color of the coated fastener is metallic silver.

Our coating process insures that the fasteners will not have any hydrogen embrittlement. **Dyna-Coat®** employs several forms of corrosion resistance, such as replacement, inhibition, envelopment and electrochemistry. These coated fasteners also have strong resistance against acid and alkaline chemicals.

Salt-sodium chloride 5%  
Water-Distilled water  
Temperature 95° F +/-2° PH of collected salt  
Water 6.50-7.20

Chamber Type/Model

Chip/Mar resistance
