

# DYNAMIC FASTENER

*Everything for the Metal Builder & Roofer®*

9911 E. 53rd Street • P.O. Drawer 16837 • Raytown (K.C.), MO 64133-0937

NATIONAL 800-821-5448    KANSAS CITY 816-358-9898    FAX 800-844-1199    CHICAGO 708-615-1450    HOUSTON 713-647-8665    LAS VEGAS 702-566-1555    MEMPHIS 901-369-8000    ST. LOUIS 314-739-8771    ST. PAUL 651-644-1212

Company Name \_\_\_\_\_

Contact \_\_\_\_\_

Phone Number \_\_\_\_\_

Job Name \_\_\_\_\_

1) Who is the panel manufacturer? \_\_\_\_\_

2) What does the panel mfg. call this panel profile? \_\_\_\_\_

3) What is the thickness (gauge) of this roof panel? \_\_\_\_\_

4) What is the material this panel is made of (steel, copper, etc)? \_\_\_\_\_

5) Rafter length (eave-to-ridge dimension measured in plan view) is \_\_\_\_\_ feet. \_\_\_\_\_

6) Roof slope is \_\_\_\_\_ :12

7) Panel seam spacing is \_\_\_\_\_ inches.

8) Panel seam height is \_\_\_\_\_ inches.

9) This quote is based on design roof snow (not ground snow) load of \_\_\_\_\_ pounds per square foot.  
**(This information is critical for an accurate quote!)**

(10) This information was furnished by \_\_\_\_\_ of \_\_\_\_\_ company.

(11) This lineal footage to be protected by snow retention \_\_\_\_\_

(12) Will there be any eave lengths partially but not completely protected by **DYNA-GUARD**? \_\_\_\_\_

**\*\*Please include a rough sketch of the building to be protected including any adjacent buildings.**

**DYNA-GUARD** should only be installed after proper design work was done by an engineer, architect, installer or building owner and it is the sole responsibility of the architect, designer, installer &/or building owner to assess the suitability of using **DYNA-GUARD** based on the above design considerations. Before installing **DYNA-GUARD** make certain that the roof & building can withstand the load and forces that will be exerted on this snow retention system. This load will be completely transferred to the building structure. Finally, no matter how much is designed into a system, Mother Nature will throw more at us than we have considered, such as drifting, ice, unusual amounts of snowfall, etc. Owners must be aware of these conditions and when these extremes are reached, snow and ice should be physically removed from the roof. Any snow retention system will not prevent possible wind-blown overhangs or cornices. The owner must be aware of these situations and remove them as they occur.
