

D•F® DYNA-GUARD®

DYNA-GUARD® snow retention system is a continuous rail-system designed to be used on metal roofs. This rail-system can be easily installed on a new construction project or retrofitted to an existing metal roof.

Dyna-Guard is an 8' long extruded aluminum stick with a T-shape profile. Simply insert a 2" wide painted strip of metal from the same material as the roof to maximize roof line aesthetics and to provide year round protection from devastating snow and ice avalanches.

DYNA-CLIPS® are used as an option to attach the Dyna-Guard to the DYNA-CLAMPS®. Dyna-Clips are necessary to use if the seams are not divisible by 4" or 6", or if the Dyna-Guard is not being installed perpendicular to the seams. Use unpunched Dyna-Guard when using Dyna-Clips.

If the Dyna-Guard is being installed in the common "perpendicular to the seams orientation" and if the seams are divisible by 4" or 6" then you may order & install prepunched Dyna-Guard. Then, the prepunched Dyna-Guard bolts directly to the Dyna-Clamp without using a Dyna-Clip.

Where Dyna-Clips are required, the installer can field drill in lieu of using the Dyna-Clips. If field drilling, then check out the DYNA-GUIDES (on pg. 69).

Priced per clip	PCS/BOX	BROKEN BOX	1-2 Boxes	3-4 Boxes	5-6 Boxes	7-9 Boxes	10+ Boxes
DYNA-CLIPS®	100	\$1.99	\$1.75	\$1.50	\$1.25	\$1.10	\$0.99

Unpunched
